

Docket No. CM00441C

Amendments to the Specification

Please replace the paragraph beginning at page 16, lines 26 with the following rewritten paragraph:

TSCs 340-348 are respectively coupled to BTSs 350-364 that provide a wireless (air-interface) link with MSs ~~370-376~~ 370-374, which may be coupled to a computing terminal such as a personal computer 380, 382. In this configuration, each SDR obtain MS mobility information from all the ZCs in the zones that the SDR is serving. This information is distributed, as described above, in a multicast message.
